Claims 82-10, 103-144 and 146 are presented for examination.

Applicants' amendment and response filed April 10, 2008 have been received and entered.

Accordingly, the rejection made under 35 USC 103 over Riedel et al. (6,558,680 B1) in view of Chapin et al. (4,370,319) as set forth in the Advisory Action dated March 27, 2008 at pages 203 is hereby withdrawn since the prior art does not disclose applicants' critical limitation (substantially free of mono- and di-fatty acid esters of glycerol and glycol).

The allowance of claims 126-144 are withdrawn so that a new rejection can be made.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 82-101, 103-144 and 146 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This is a written description rejection.

A lack of adequate written description issue arises if the knowledge and level of skill in the art would not permit one skilled in the art to immediately envisage the

product claimed from the disclosed process. See, e.g., *Fujikawa v. Wattanasin*, 93 F.3d 1559, 1571, 39 USPQ2d 1895, 1905 (Fed. Cir. 1996) (a "laundry list" disclosure of every possible moiety does not constitute a written description of every species in a genus because it would not "reasonably lead" those skilled in the art to any particular species); *In re Ruschig*, 379 F.2d 990, 995, 154 USPQ 118, 123 (CCPA 1967).

An applicant may also show that an invention is complete by disclosure of sufficiently detailed, relevant identifying characteristics which provide evidence that applicant was in possession of the claimed invention, i.e., complete or partial structure, other physical and/or chemical properties, functional characteristics when coupled with a known or disclosed correlation between function and structure, or some combination of such characteristics.

In particular, the specification as original filed fails to provide sufficient written bases of any of the agents demonstrating wherein possession of use of the broad terms: one or more C₁₂-C₄₀ fatty acids, one or more C₁₂-C₄₀ fatty alcohols, an amphiphilic polymer, an associative polymer, a siloxane elastomer, one or more C₁₂-C₄₀ polyethoxylated fatty acid esters having a polyethoxy chain length of from 10 to 100, one low molecular weight surfactant, a pigment, a dye, one or more polar lipids having a polarity of at most 30 mN/m, a solubilizer, a photoprotective filter, a moisturizer, an active ingredient, a powder raw material, a preservative, a filler and a deodorant. The mere fact that Applicant may have discovered one type(s) of C₁₂-C₄₀ fatty acids, C₁₂-C₄₀ fatty alcohols, an amphiphilic polymer, an associative polymer, a siloxane elastomer, one or more C₁₂-C₄₀ polyethoxylated fatty acid esters

Art Unit: 1614

having a polyethoxy chain length of from 10 to 100, one low molecular weight surfactant, a pigment, a dye, one or more polar lipids having a polarity of at most 30 mN/m, a solubilizer, a photoprotective filter, a moisturizer, an active ingredient, a powder raw material, a preservative, a filler and a deodorant is not sufficient to claim the entire genus.

The written description requirement for a claimed genus may be satisfied through sufficient description of a representative number of species by actual reduction to practice, reduction to drawings, or by disclosure of relevant, identifying characteristics, i.e., structure or other physical and/or chemical properties, by functional characteristics coupled with a known or disclosed correlation between function and structure, or by a combination of such identifying characteristics, sufficient to show the applicant was in possession of the claimed genus. See *Eli Lilly*, 119 F.3d at 1568, 43 USPQ2d at 1406.

A "representative number of species" means that the species which are adequately described are representative of the entire genus. Thus, when there is substantial variation within the genus, one must describe a sufficient variety of species to reflect the variation within the genus. The disclosure of only one species encompassed within a genus adequately describes a claim directed to that genus only if the disclosure "indicates that the patentee has invented species sufficient to constitute the gen[us]."

Claims 82-101, 103-144 and 146 are not allowed.
